

Justin Yaung

408-621-7809 | juya7142@colorado.edu | [linkedin.com/in/justin-yaung](https://www.linkedin.com/in/justin-yaung)

EDUCATION

University of Colorado Boulder

Bachelor of Sciences in Aerospace Engineering — GPA: 3.93

Boulder, CO

Aug. 2025 – May 2028

PROFESSIONAL EXPERIENCE

Teaching Head

ByteBuilders

Dec. 2023 – Jan. 2025

San Jose, CA

- Led and mentored a volunteer team of twelve while providing free STEM education to over 500 K-8 students
- Raised over \$5000 via donation campaigns and marketing events

RELEVANT EXPERIENCE

Model and Hybrid Rocket Propulsion and Flight Simulation

University of Colorado Boulder

Aug. 2025 – Dec. 2025

Boulder, CO

- Built and launched a model rocket with flight trajectory prediction modeling in Excel
- Hot-Fired a hybrid rocket engine, collecting and validating thrust data against Excel modeled predictions

Aircraft Structures Lead

Design Build Fly @ CU

Aug. 2025 – Current

Boulder, CO

- Designed and modeled an RC airplane fuselage in Fusion360, optimized for aerodynamics within a mass/volume budget
- Created G-Code and used Hotwire CNC to cut RC airplane wings and tail, with control surfaces and spars
- Assembled and wired complete fuselage, wing, and tail structures

Structures and Systems Engineer

Rover Team @ CU

Aug. 2025 – Current

Boulder, CO

- Built Gantt-chart schedules to coordinate design, manufacturing, and test phases across subsystems
- Coordinated subsystem interfacing and verified integration
- Produced technical reports and documentation summarizing design and test processes
- Designed and modeled a rover chassis in Fusion360, optimized within a mass/volume budget
- Assembled rover chassis and suspension systems

PROJECTS

5" Freestyle FPV Drone | *CAD, Soldering*

May 2026 – August 2026

- Designed and modeled a RC Drone using Fusion360
- Chose electronic components based on motor power draw and amperage requirements
- Assembled frame and 3D printed parts, soldered ESC to FC wiring

RC Airplane | *CAD, Soldering, 3D printing*

May 2026 – August 2026

- Designed a custom RC Airplane in Fusion360
- Selected a motor, ESC, and prop system for desired thrust and control
- 3D printed components and assembled complete airplane

TECHNICAL SKILLS

Programming: Java, Python, MatLab, HTML/CSS

CAD and Manufacturing: Fusion360, Solidworks, 3D printing, CNC Machining

Hardware and Electronics: Arduino, Servos, Sensors, Soldering
